Lead Story Headline

The Holidays are a pleasant time of the year. Our spirits are high and vibrant, filled with thoughts of happy gatherings and reunions with friends and family.

Regarding past years we all have memories of happy times with family such as parents grandparents brothers, sisters, uncles and cousins. For most of us, these represent the good old times.

In November, as a nation, we give Thanks to God for the many blessings that he bestows on the most blessed nation in the world. Let us remember to seek his wisdom and guidance, praying that our nation remains

strong and continues it's God fearing culture established by our founding fathers.

Stressful times in business takes us away from enjoying every minute of our existence but we need to slow down, relax and savor the moment.

Even on tough economic times there have been many good things that have happened and will continue in the future.

I give a lot of thought of ways in which to serve you better. Serving you better with a positive and happy attitude allows us to offer

products and service that are beneficial to you and your occupation. It gives me joy to recognize that our good performance has helped out in your job. My goal is to stay in touch by written messages, we will also do tele-marketing, and also invite you to review our website. It is not as good as I want but changes will be made periodically.

I am enclosing information about tank liners. Call us if you have any interest.

Sincerely,
Ralph Marrujo

New Product

Witt Lining Systems is expanding on our success with Koroseal drop in tank liners by now offering High Performance Koroseal drop in liners.

High Performance (HP) Koroseal is a proprietary compound formulation that has

significantly reduced plasticizer mobility and extraction rates over the standard Koroseal formulation. This improved formulation results in an even longer service life than the standard Koroseal provides. The use of HP Koroseal also allows improved performance in the harshest

of corrosive environments and raises the high temperature limit to 215 F.

HP Koroseal is currently available in 3/16 in.gauge. For more info see our website at www.wittliners.com and feel free to contact us for material samples.

Special points of interest:

- EQMPT-Source Keeping it Strong
- New Products to talk about
- Featuring Witt Lining Systems
- Look Out for our monthly Newsletters

Witt Lining Systems

Koroseal Protective Lining materials are designed for the most demanding containment environments, providing exceptional corrosion resistance to acids, alkalis and salts. Formulated from proprietary thermoplastic compounds that have earned "best in the business" accolades for decades, these remarkable materials are now available to you in a flexible drop in liner configuration through Witt Lining Systems.

That means you can now benefit from the reliability and cost effectiveness of

a Koroseal lined vessel without having to fuss with the metal preparation and adhesive complications inherent in bonded liner system, as well as the elimination of the substantive operational down time for a bonded relining requirement. Utilization of the Witt Lining Systems Koroseal drop in liner system includes the following benefits.

The Koroseal liner can be installed by the tank owner's own personnel as no special skills are needed.

Koroseal liners from Witt Lining Systems do not require bonding to the sub structure.

The utilization of Koroseal drop in liners by Witt Lining Systems eliminates the need for sandblasting, tank repair, cure time, and associated equipment down time

Witt Lining Systems cont....

Koroseal drop in liners by Witt Lining Systems can be easily repaired by bonding a patch to the liner and requires no special tool or personnel.

Koroseal drop in liners by Witt Lining Systems may be utilized over the top of other surfaces that may not accept the adhesive (such as other plastics).

When upgrading to a drop in Koroseal liner, tanks do not have to be moved off line for liner installation.

Look out for December Issue

December is coming—time for maintenance, up-keep and repairs.

Keep us in mind if we can help and be of service.
